### **Why can't they work at night?**

I would like say something about the construction on 13 by the weigh station and around Odessa. Why can't this construction be done during the evening hours from 9 p.m. to 6 a.m. instead of during daytime when the roads are heavily used? Other states do this. Delaware is supposed to be the first, so what are we the first for? Traffic jams. If this was done at proper time in the evenings there would not be as much backup.
